Education

Bachelor of Science in Geography: Geographic Information Science

University of Minnesota Twin Cities | Expected Dec 2026 | GPA: 4.0

Work History

City of Minneapolis Public Works, Surface Water and Sewer

GIS Engineering Intern | June 2026- Present

- Wrote Python scripts to automate the aggregation and processing of hydraulic model outputs, perform geoprocessing and analysis, and generate flood risk scores for stormwater and sewer assets
- Developed and automated a system for updating pipe condition scores based based on maintenance activity

University of Minnesota Department of Geography, Environment, Society

Undergraduate Teaching Assistant | Jan. 2026- May 2026

- Graded assignments and provided feedback to students, answered student emails
- Worked with instructor to develop materials for course curriculum including processing raw datasets for exercises, and developing training materials for field data collection

Northup Saunas

Product Designer | Nov. 2024- Present

- Designed, prototyped, and finalized manufacturing specifications for a shippable sauna
- Developed assembly manuals featuring step-by-step instructions and technical graphics
- Tracked product issues through the production cycle and implemented troubleshooting solutions to improve product reliability and assembly efficiency

Western EcoSystems Technology

Detection Dog Handler | June 2023- Oct. 2025

- Trained detection dogs to detect bird and bat fatalities on operational wind energy facilities, collecting geospatial and biological data
- Used QGIS to digitize anthropogenic disturbances and bat habitat, created site maps for field navigation, edited feature layers for quality control
- Designed training materials instructing field staff how to take track logs, use coordinate geometry, and best practices for collecting field data
- Assisted in mist-netting bats and tracking to roosts with radio telemetry

Relevant Skills

- Extensive experience with wide range of software: Esri products (ArcGIS Pro, Arcade, Field Maps, Survey123, ArcGIS Online, Experience Builder), QGIS, R, Python (Pandas, SciKit Learn, GeoPandas, Folium, Leafmap, Rasterio, Matplotlib, Pysal), AutoCAD, Mapbox, CARTO, Trimble Terraflex, Form.com, QField, Adobe products (Illustrator, Premiere Pro, After Effects, Audition) Microsoft Office (Word, Excel, Powerpoint, and Outlook)
- Collecting data in the field with wide variety of equipment: GNSS receivers (Trimble Catalyst DA2, Garmin eTrex 32x), drones, radio telemetry receivers, compass, rangefinder, clinometer, densiometer
- Cartographic design, spatial analysis, terrain modeling, dashboards, data cleaning, building and maintaining geodatabases
- Working independently and collaborating on high stakes projects
